## Document all-round Scanner App now available for iPhone® and Android® Systems

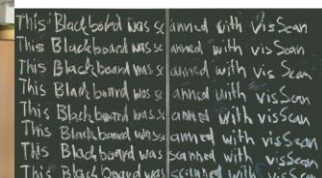

### Press-Release

STUTTGART 22 July 2016 - visart has released visScan, the new document all-round scanner for mobile smartphones. Scan documents, tables, blackboards, whiteboards, projectors and flipchart with your smartphones. Use fine floating adjustment for post processing color, brightness & contrast. Export scan as image or PDF to your cloud service. A unique PDF compression (soon available on IOS) method saves you 50% file size.

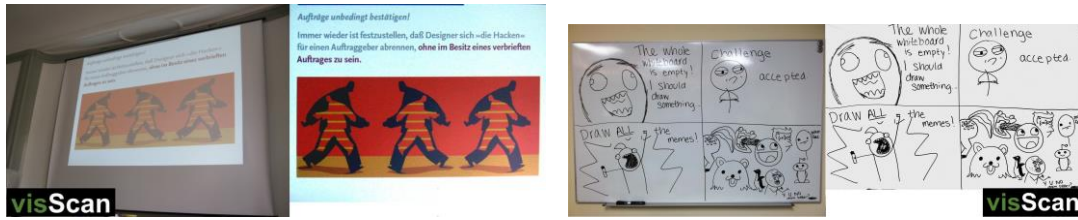

[product video](#)

visScan is not only a document scanner app, it is designed to scan all kinds of media. For every media there is a specified filter processing.

visScan corrects the perspective without distortion.

**visScan** is really fast. The algorithms are all speed optimized.

**visScan** is always in full resolution. The characters and fine-print stay readable. It can be used for reprinting.

**visScan** has a beginner tutorial and detailed documentation.

**visScanLite** is the free version of **visScan**

- with **advertising**
- **less export** possibilities
- PDF **watermark** with QR Code
- documentation **in English only**

Website: [visScan](#) & [visScanLite](#)
